#### PRINT LONGEVITY

- Outdoor life expectancy without noticeable fading - 4 months
- Indoor life expectancy without noticeable fading - 6 months

*\*Based on accelerated age testing. Actual results may vary based on use.*

#### SOFTWARE SETTINGS

When using this material with Encad® inks, utilize the UCR (Under Color Removal) technique that replaces composite black (CMY) with the appropriate amount of black ink. To optimize print quality, printers should be set for the highest print quality and media selection should be "heavy coated." Ink coverage up to 350% is recommended.

#### FINISHING RECOMMENDATIONS

Océ Options OPSCRM2 can be overlaminated with both thermal (max. 185°F) and pressure sensitive laminates, for additional scratch resistance and moisture protection when needed. Make sure that prints are completely dry prior to laminating.
